

*"Fishing discard. Tackling the problem from a research and innovation perspective",
publicado por la European Fisheries Technology Platform (EFTP)*

Report of the workshop conclusions: "Fishing Discards. Tackling the problem from a research and innovation perspective" ; 11/2012

Abstract: Fishing discards is one of the main priorities for EFTP members. By means of implementing a collaborative methodology, stakeholders are invited to contribute to a common vision about the problem and on how to tackle it. The output envisaged will be part of the EFTP Strategic Research and Innovation Agenda and could become a valuable input for defining future RTDI policies with regard to fishing discards.
