State of nature in the EU

[State of nature in the EU](#) . Technical report No 2/2015. EEA (European Environment Agency).

Abstract: Results from reporting under the nature directives 2007-2012. This report describing the state of nature in the EU is based on reports from Member States under the Birds and the Habitats directives and on subsequent assessments at EU or EU biogeographical levels. It provides comprehensive facts and figures on the status and trends of the species and habitats covered by the two EU nature directives, fully underpinned by the numerous reports submitted by Member States in 2013.
